### Similar Features of Model 300 & 400 Guns

- ? Both guns operate at same max pressure 3600PSI
- ? Same filter and sizes for both guns
- ? same trigger on 2 & 4 finger models
- ? same trigger lock for both guns
- ? Both guns have same contractor style Aluminum gun body
- ? Both have easy turning stainless steel swivel
- ? Both have safe internal trigger lock
- ? Both have *Hand -Tight* Split handle
- ? Both include *Wrench Tight* Zip-Tip base
- ? Same gun repair kits, identical parts for both guns - ie Model 300 can use same two piece ball valve plunger assembly with stainless steel diffuser

### Differences between Model 300 and 400 Guns

- ? Model 300 gun will come with new tough plastic trigger and guard in 1999
- ? Model 400 now comes in Blue/Grey Color for upgraded identity, Model 300 will remain natural aluminum color.
- ? Model 300 has Delrin Seals/ Model 400 Teflon seals
- ? Model 400 has a plastic cover for protecting push rods from overspray
- ? Model 400 gun comes with stainless steel diffuser, Model 300 comes with plated steel diffuser but can be upgraded at a later date to stainless steel.
- ? Model 400 has separate swivel assembly, model 300 swivel is built into the lower section of the split handle - both are easy turning stainless steel swivels
