

## Drum extrusion pumps

HERO's 200 liter drum extrusion pumps are well designed to work with high viscous materials up to 100,000 centipoise. The up and down stroke of this pump is controlled by two pneumatically operated posts.

Model No: HRO-960-581

Model No: HRO-960-401

### [ Technical Data ]

	HRO 960-581	HRO 960-401	Unit
Pressure ratio	58:1	40:1	
Operating air pressure	3-6	3-6	bar
Discharge pressure Max.	350	240	bar
Pump stroke	120	120	mm
Delivery Max.	16	11.4	liter/min
Pump speed Max.	80	80	cycle/min
Air inlet size	3/4	3/4	inch
Fluid inlet	1 1/4	1 1/4	inch
Fluid outlet	1	1	inch
Flow volume	200	143	cc/cycle
Inductor ring size	584	584	mm
Ram air inlet size	1/4	1/4	inch
Ram dimension	1,067 × 670 × 1,563	1,067 × 670 × 1,563	mm(L × W × H)
Pump unit weight	330	320	kg
